

testXpo

31st International Expo for Materials Testing

October 16–19, 2023 at ZwickRoell in Ulm, Germany

Welcome to the 31st testXpo – International Expo for Materials Testing!

- Experience materials and component testing up close with more than 200 exhibits.
- Discover the latest measurement and testing technology applications in an exhibition area of over 3,500 m².
- Learn more about trends in quality assurance for seven industries in nearly 70 featured presentations
- Network with other attendees and experts from around the globe in a relaxed atmosphere.

About testXpo.

From October 16-19, 2023, our headquarters in Ulm will once again be your hub for materials and components testing. At testXpo, the ZwickRoell Group, along with 20 co-exhibitors, will present new developments and solutions for research and development as well as for quality assurance. Discover customized testing solutions and new developments showcased in seven industry centers. Exhibited products will range from static testing machines, fatigue testing machines, and hardness testers to pendulum impact testers to extrusion plastometers.

testXpo participation, including all expert presentations and lunch, is free of charge. Register now at: www.testXpo.de

Experience Innovation.

- Static testing machines up to 2,500 kN
- Dynamic testing systems with various drive concepts
- Hardness testers for the nano, micro, and macro ranges
- Melt flow indexers, pendulum impact testers, and drop weight testers
- Testing software, specimen grips, load cells, and extensometers
- Automation, temperature testing, and custom solutions
